*"Marshall's maternal line is loaded with production. His great-granddam finished with 96,720 kg of milk in 8.4 lactations. His daughters will be above-average in frame, muscling and udders. He will add slope to the rump. His pedigree calving ease is just above breed-average; therefore, he should not be used on heifer matings. He is positive for fat %."
- Dr. Marv Johnson, breeder*
